

m+p VibRunner

Hardware racks

Flexible hardware racks, designed for m+p international VibRunner hardware, offer versatility with customizable low or high-density layouts. This flexibility maximizes space, streamlines workflow, and supports future expansion, making them ideal for dynamic testing environments.

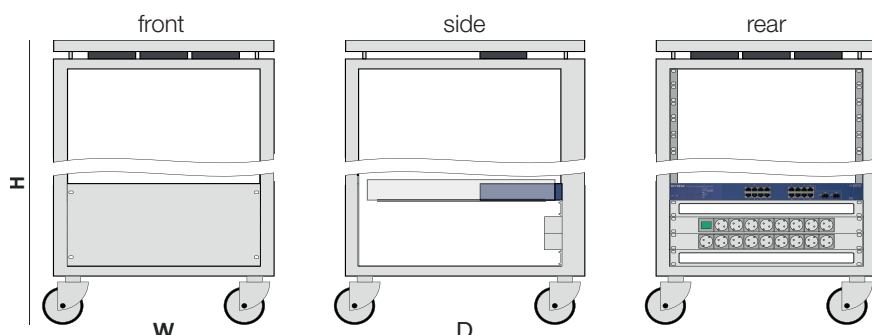

Technical specifications

Cabinet size	Max. VibRunners - low density	Max. VibRunners - high density	Height (mm)	Width (mm)	Depth (mm)
S	3	4	772	553	600
M	7	10	1345	553	600
L	11	14	1739	553	600

Surface finish	RAL7035, matt
Fan	Included in top cover of rack
Wheels	Antistatic wheels included (resistance $\leq 10k\Omega$)
Scope of delivery	Rack incl. antistatic wheels, fan, internal power distribution, assembly and final testing
Panels	Sides left/right: detachable, lockable panel Rear: lockable Front: open

Base frame

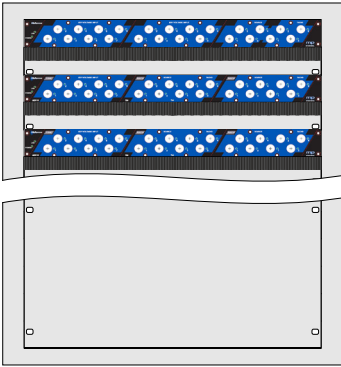

- Slot for network switch foreseen, quoted separately.
- Number of power outlets adjusted to number of m+p VibRunner devices without notice.

m+p VibRunner assembly layout

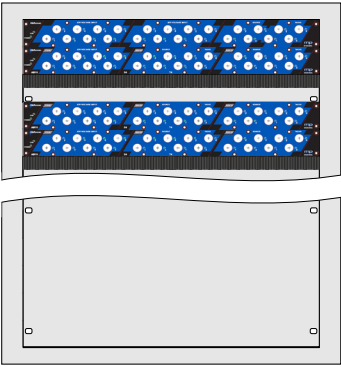

Default layout:

low density packing

Alternative layout to fit more m+p VibRunners:

high density packing

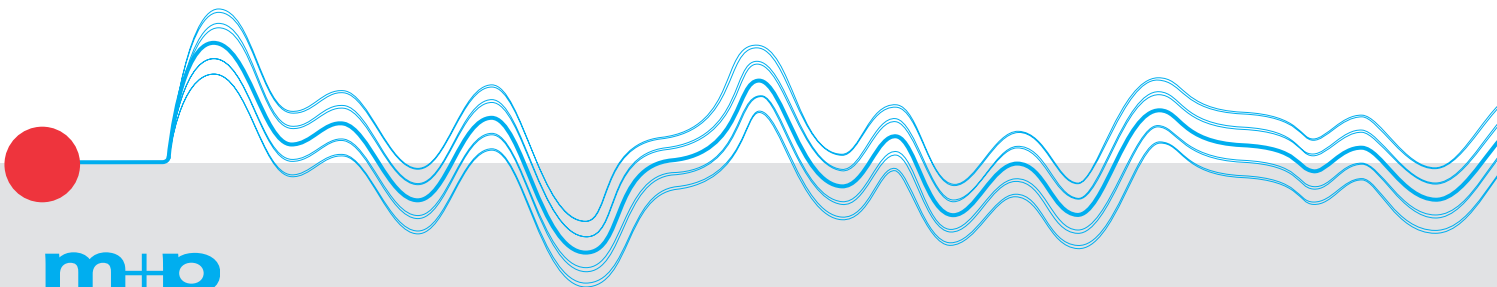

Recommended auxiliary parts

Depending on the overall system configuration following network switch and computer power is required.

Sample rate	Channels	Required network speed Quoted separately, if ordered in same purchase it will be mounted in the rack before delivery.	Required workstation Quoted separately.
102,4kHz	<160	1Gbit	Intel i7, 16GB RAM, 1TB SSD
	≥160	10Gbit	Intel i9, 32GB RAM, 2TB SSD
204,8kHz	<80	1Gbit	Intel i7, 16GB RAM, 1TB SSD
	≥80	10Gbit	Intel i9, 32GB RAM, 2TB SSD

Other configuration on request.
